																	in Mould Labelling
																	personalized labels (barcodes, serial numbers..)
																	chip allocation
																	standard colours (special colours available on request)
																	bag-holding lid
																	wheels options (ø 200 mm standard)
																	lid with rubber round aperture ø 90 mm for can waste collection
																	lid with rubber round aperture ø 160 mm for glass/plastics waste collection
																	lid with rubber round aperture ø 200 mm for glass/plastics waste collection
																	lid with rubber round aperture ø 280 mm for glass/plastics waste collection
																	lid with rectangular aperture and rubber protection (150x250 or 260x215)
																	aperture for paper collection
																	specific insert for expired medicines collection
																	specific insert for expired batteries collection
																	lid within lid insert
																	micro-perforations allowing air to circulate for organic fraction
																	grill fitted in the base of the container for organic fraction
																	lock with triangular key
																	SUDHAUS gravity lock or with triangular key
																	JCO gravity lock
																	directional lock
																	halved lid (2 pieces)
																	foot pedal for lid opening
																	dampened closing lid
																	central brake
																	additional handles
																	stationary model (with feet)
																	Tow-hook
																	male lifting device DIN+ EN 840 (other lifting systems available on request)
																	Comb lifting device EN 840 C (DIN)
																	Comb lifting device EN 840 A (AFNOR)
																	Bologna lifting device/DIN fitted on Bologna lifting device
																	male lifting device fitted on box device EN12574
																	Diamond lifting device

CE PRINTING and indication of sound power level according to 2000/14/EC directive on 80L, 120L, 140L, 240L, 360L, 660L, 770L, 1000L, 1100L flat lid and round lid

The products are injection moulded in high density polyethylene (HDPE) therefore they are 100% recyclable

The products 240L, 360L, 660L, 770L, 1100L are ONU ADR certified for the transport of clinical waste. The box 600L FOR SPECIAL USES IS ADR ONU certified for the transport of expired batteries.

The products are certified GS-TÜV (Certificate of the product and the safety at work according to EN 840 standard, RAL-GZ 951/1 and EN 12574).
